

Election/Polls Survey Application

A mobile application to create & conduct extensive field surveys for Polls, Elections and Contests etc. It uses Analytic tools and algorithms to judge the impact of various schemes which have been implemented by Government or other Institutions.

Dashboard Screenshot

Administrator can

- Create/Modify/Delete Surveys
- View results of various surveys
- Run Analytics on Survey results
- View respondent details
- Generate reports based on demographics and various other parameters

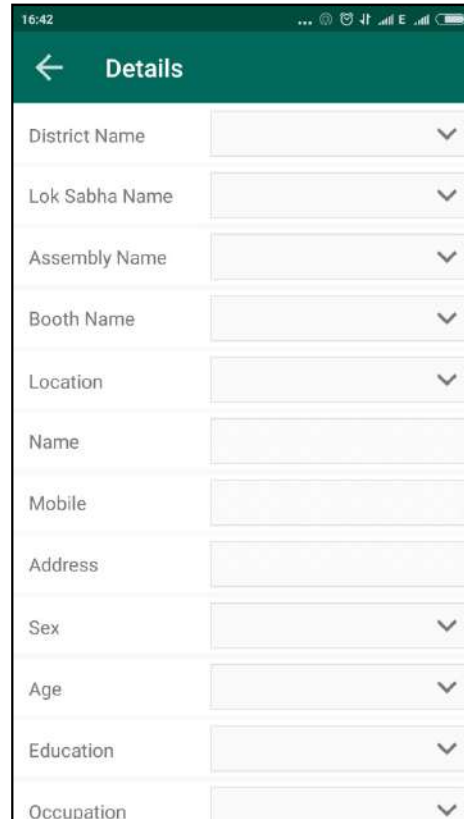

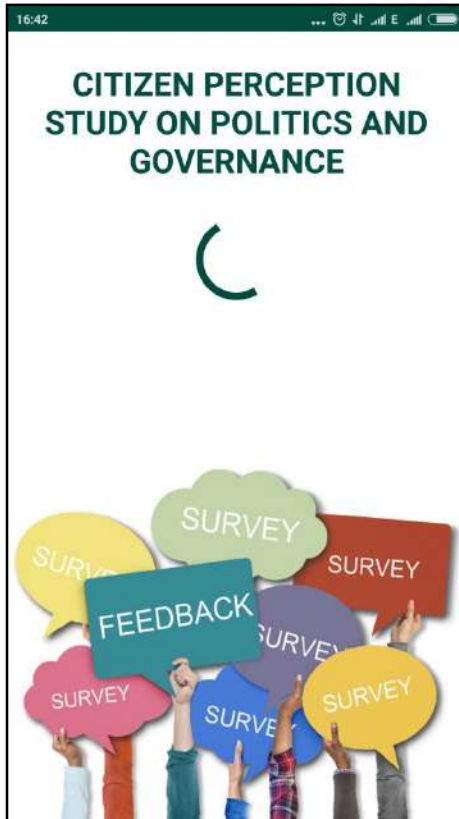

Security

To make it secure - it's a Login based application, protected by administrator authorized OTP functionality.

DATA Integrity/Correctness/Immutability

Data is collected with respondent location i.e. collected with his/her GPS location and securely stored in the system.

Application Screenshots

Details	
District Name	<input type="text"/>
Lok Sabha Name	<input type="text"/>
Assembly Name	<input type="text"/>
Booth Name	<input type="text"/>
Location	<input type="text"/>
Name	<input type="text"/>
Mobile	<input type="text"/>
Address	<input type="text"/>
Sex	<input type="text"/>
Age	<input type="text"/>
Education	<input type="text"/>
Occupation	<input type="text"/>

Flow/Features

- Agent adds basic details of the respondent.
- Shows respondent the questions that have been added by the administrator
- Receives respondents reply to questions
- Basic check applied on the input like mobile number
- Application reads GPS location of the agent

Advantages

- Users need not be tech savvy to participate in the survey
- True surveys with accurate location information
- Genuine research data without human bias
- Data saved locally till synced with server – so keeps on collecting data without Internet connection.

Administrator create various Surveys like

- Single or Multi select answers
- Multiple questions in a single question
- Multiple questions with multiple inputs
- Customized User input
- Multiple select without upper limit

Advanced Analytics

The application can collect and store huge sample data quickly – Analytics can be run on data to predict outcome from a sample population size. These Analytics are customized for each survey.

The Analytic Model will show exact impact on the ground of various schemes or speeches. Demographic wise reports can be prepared so that concerned agencies can take steps to streamline their projects.
